

## HxGN dC3 Web Client

Experience hassle-free security operations with HxGN dC3 Web Client. Designed for easy deployment, this add-on to HxGN dC3 Video and HxGN dC3 Orchestrator minimizes installation and maintenance efforts as it requires no client-side software installation. All you need to do is maintain an application on the server that runs Hexagon's video management (VMS) or physical security information management (PSIM) software.

Access your HxGN dC3 systems with a common interface that works seamlessly across all devices, with no additional installations required. And, on the VMS side, minimize your hardware footprint because the application can display H.264/265 video streams without plug-ins, eliminating the need for hardware transcoding.

### Powerful and platform independent

HxGN dC3 Web Client can be used to access a HxGN dC3 Video and/or HxGN dC3 Orchestrator installation at any time from any device that has a browser installed. Engineered from the ground up, it harnesses cutting-edge streaming technology to deliver unrivaled

performance. With lightning-fast live viewing, seamless playback and powerful incident management tools, it's built to handle the demands of any environment with precision and efficiency.

Users have access to the physical security information they need, wherever they are out in the field on patrol, after hours and off-site or in the control room.

Its highly secure, modern user interface can be accessed via multiple browsers on various platforms. And its exceptionally low latency enables real-time decision-making.

# Ease of use

It's easy to start using the HxGN dC3 Web Client. Your on-premises server takes over communication with your Hexagon PSIM or VMS and streams information and video over the network securely. No additional software installation is required; just enter your server URL, log in and you're set!

## Open

HxGN dC3 Web Client can be accessed via standard browsers (Edge, Chrome) on various platforms (Windows, Mac OS), delivering optimal performance and low latency.

## Familiar

The user interface is designed in-line with the desktop client and includes many of its advanced functions. This means users will feel right at home, without additional training.

## Secure

HxGN dC3 Web Client is easy to install and supports clusters and failovers. The data connection between it and its server is encrypted and uses only one network port.

# Supported features

HxGN dC3 Web Client connects to the network via a web server. In the user interface, end users can interact with Hexagon's VMS and PSIM solutions.

## Application

- Multiple log-in options (e.g., single sign-on (SSO), Active Directory, OpenID)
- Health monitoring with HxGN dC3 Umbrella
- Web client manager for easy SSO certificate management
- Standard maps integration

## Video management

- Playback of live and archive footage (format: H.264/H.265)
- Access to archive timeline – follow up on alarms, set and use bookmarks
- Control of PTZ and digital PTZ cameras/dewarping
- Dynamic multistreaming
- Support for privacy masks
- Video and snapshot exports

## Incident management

- Alarm management
- Incident resolution
- Workflows and forms
- Automatic actions

Hexagon is the global leader in precision technologies at any scale. Our digital twins, robotics and AI solutions are transforming the industries that shape our reality.

Hexagon's Safety, Infrastructure & Geospatial division improves the resilience and sustainability of the world's critical services and infrastructure. Our solutions turn complex data about people, places and assets into meaningful information and capabilities for better, faster decision-making in public safety, defense, transportation, government and physical security.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 24,500 employees in 50 countries and net sales of approximately 5.4bn EUR. Learn more at [hexagon.com](https://hexagon.com) and follow us [@HexagonAB](https://twitter.com/HexagonAB).
